

Both TMS and ABC were active in March on 6428 kHz. TMS is seldom on the air.

02-3: TMS at 0755 UTC and at least on the air till 0920 UTC

03-3: ABC at 0758 UTC and still active at 1524 UTC

04-3: ABC at 0707 UTC and still active at 1922 UTC

06-3: ABC at 1700 UTC

07-3: ABC at 0742 UTC still running, probably at least since yesterday morning.

08-3: ABC at 0350 UTC

6840 kHz, 07-3, 2230 UTC: both YHF2 and EZI with a group 63 message!

<<<<<<<<<-0-0-0-0-0-0-0-0-0-0->>>>>>>>>

Philip copied an interesting E11 transmission 7317 kHz at 1759 UTC on 5 March.
Message: 121/111/00. Nice catch Philip!

Mike submitted an E11b transcript heard on 09-3 at 0815 UTC on 9060 kHz.

::: XSL "JAPANESE SLOT MACHINE"

```

Some of you are probably already using the Sigmira decoder. This is a very nice, free of charge decoder that recently added a new mode to the program. This QPSK mode is better known to many dxers as the "Japanese Slot Machine". The system is being used by the Japanese navy. Sigmira doesn't really decode the information. It only displays the "frames" and raw QPSK symbols. You can download the decoder and its manual from <http://www.saharlow.com/technology/sigmira/index.htm>

The following is quoted from the Sigmira manual.

"With some investigation the symbol rate was determined to be 1600.00 baud.

The regular ticking sound was found to be an exactly repeating sequence of symbols. Clearly that serves as a channel probe and frame synchronization pattern. One tick sound period is here defined as a "frame". Frames were found to consist of 140 QPSK symbols. So the frame rate is 11.42857 Hz. The probe/sync pattern is 28 symbols which is one fifth the number of symbols per frame. It is found that, during the repetitive melody idle time, the remaining symbols of a frame consist of four repetitions of another 28 symbol pattern. So a frame appears to consist of five "blocks" of 28 symbols. During idle time there is a finite set of symbol patterns that appear in the blocks. The patterns are designated here: ps, p0, p1, p2, p3, p4, p5, p6, p7, p8, p9, p10, and p11. The "ps" pattern is the probe/sync pattern. The rest are numbered roughly in the order of their frequency of occurrence. The "p0" pattern is most common. The melodic idle time consists of an exactly repeating sequence of 64 frames. A 64 frame sequence is called a "super frame" here. The duration of a super frame is 5.60000 seconds. The frame / block pattern of the idle super frame is presented in the following table. The melody arises from the regular repeated simple patterns of symbols/phases. The p10 pattern is all one phase. So it produces a single tone. The p11 pattern is also all one phase but 180 degrees from p10. The other patterns are somewhat more complex and result in different and multiple apparent tones."

★ MILITARY STATIONS ★

::: RUSSIAN, CIS, UKRAINIAN MILITARY SSB & CW STATIONS (including M32)

82 Hz Since 0700 UTC on March 6, the Russian ELF transmitter Zevs has been on continuously with a carrier in between the messages. Strategic 3FG messages broadcasted "076" at 0940 UTC, "069" at 1428 UTC and "935" at 1748 UTC. The regular broadcast schedule with messages at 0900 UTC and 1800 UTC aborted. This type of operation by the Zevs transmitter was last observed during the Georgia invasion. (Copied by Trond)

18.1 Russian High Command Moscow, unid tx site. Strategic flash message to unid "REU". "xxx xxx reu reu 81783 41313 makarony 0023 5899 k" // 7657, 9346, 10535, 10712 kHz.

Russian high command Moscow, unid tx site. 21 group 5fg msg to RDL using codeset 11111 // on 7657, 9346, 10535, 12832, and 14411 kHz:
 "RDL 11111 t41t8 74823 335t1 335t1 1t774 2t268 4782t 75682 2t712 14529 92764 28772 16t61 59998 47636 t7438 59tt2 66153 99522 99255 t7t21 k"

The frequencies 10712 and 17088 carried also today a "non RDL" related printer running T600 aka Bee. Have any of you monitored these "Non RDL" Russian bcsts for a longer period of time ?? Did some work on these last winter, could be interesting to swap notes. (logged by Trond)

::: UNID 3343 kHz

Like last month Greg supplied logs of the still unid station on 3343 kHz.

Callsign: MWKJ.

Transmissions: two 10 minute periods each hour 50-00 and 20-30 min.

<<<<<<<<-0-0-0-0-0-0-0-0-0-0->>>>>>>>

::: UNID 6523 kHz

Jim copied this unid CIS station on 6523 kHz at 1730 UTC on 17-3. Mode: Morse.

Repeating "OchKL OchKL OchKL de RKOW RKOW RKOW QSY 19298 19298 K".

(ch = ---- accented letters are rare in callsigns). Then "QSY 19538". "BK QSA3 QSA? OK AS. QRV K. BK RPT QSY K. OK QSW 19264" and gone. Nothing happening on the 19 MHz frequencies; could be disguised references.

<<<<<<<<-0-0-0-0-0-0-0-0-0-0->>>>>>>>>

```
::: UNID =50= station
```

The `unid =50=` station that has been reported quite often before was active again on 5845 kHz at 0520 UTC on 11-3. Mode: RTTY-ITA2/50/500. Traffic: 5FGs (x215) separated with "`=50=`", ends with "`- 0524 K CFM NIL K SK`".

<<<<<<<<<-0-0-0-0-0-0-0-0-0-0->>>>>>>>>>

::: UNID 6998.5 kHz

On the frequency of the notorious Italian pirate, 6998.5 kHz, ALF heard morse transmission of an unid Russian(?) station. Any additional info is most welcome. Logged on 03-3, 1115 UTC and 14-3, 1155 UTC.

"... VDX = WID = UH = NH = TEM = DN = TTT = ShH = NOTshXYu = NNN = BBB = PDP = VARKOW = NRNR = ShBS = ShRA = ZSL ? K".

"... OSUQESTWITX = DOZAPRAWKU = GSM = DO = POLNYH = ZAPASOW = OT = PSKR = NOWOROSS = OB = ISLOLN _ NII = I = PRINYaTYH = WRK = DO = STI = PDP = MASL = NR NR = ShBS = ShAU = ZSL? BK" into sx OP-chat.

Trond also copied traffic on 6998.5 kHz on 6 March. Trond writes:

"First heard last night with what sounded like ID HWA7, with call to YC37 using this callup: "YC37 YC37 YC37 DE HWA7". The HWA7 is a bit uncertain though as AGC was off and some static crashes blanked out the signal.

A second very weak station spaced approximately 50Hz off, was obviously trying to respond but no joy. Later at 1946 UTC the morse operator reduced the speed, and spaced every letter approximately 2 seconds and made this call: "Y Y C 3 7 DE". The sender was unfortunately totally unreadable in the QRN. Again a second station pops up but most of the transmission drowns in noise as heard from this end. At 1950 UTC some pro-signs; "qrd qrd i`i`" followed a bit later by "qso qso at qit". Then this string followed: "= = = YYC37 KTC3 DE HWJH". Several minutes later a long string of "zczczczczczczczc" and nothing more heard. Even though the speed of the operator not was stable, as well as some more disturbing static crashes, I am almost 100% certain that the ID of the sender this time was given as HWJH. The ITU monitoring station at Rambouillet in France has in one of the monitoring newsletters given the bearing to a unid station on 6998.5 as 152 deg. If that is the same station as this one, then the location is not in Russia or eastern Europe, but indicates Northen Africa or UK. Guess that is not correct though.

The pro-sign QRD made me think if the broadcasts are aero related, as some other monitors of these broadcasts has suggested. (QRD; "where are you bound and where are you from ? " / I am bond from ... from ...)The i'i could then be a origin or destination code?? I would be very interested to hear from others who has monitored this station lately !"
